

Work the way you live

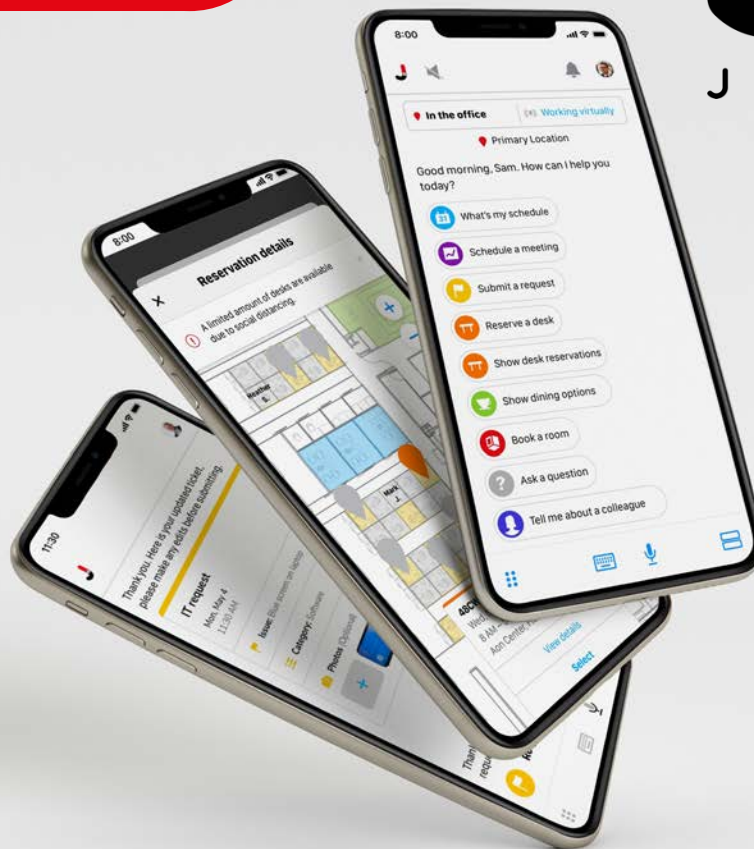

JLL Jet™ accelerates the transition to the hybrid workplace with personalized experiences that help simplify the workday, wherever that may be.

 Support blended working models and aid in re-entry to the office

 Delight your people with an intelligent and connected mobile experience

 Create instant value with plug & play integration with existing systems

To your talent, your enterprise technology matters.

80% of all companies rate their businesses as **complex** for employees. 

66% of workers report that they regularly exert **too much effort** to use company technology 

Boost productivity with a single connected app

Saves time on common activities, such as reserving desks, booking physical and virtual meetings and requesting services, so workers can quickly get back to the work that really matters.

Delight users with smart, personalized interactions

Foster engagement with intuitive, smart experiences that progressively save time and optimize interactions by replacing multi-app, form-based data entry with simple conversational input.

Keep employees informed, safe & feeling good

Ensure that workers can safely access and use shared spaces, get instant answers to company FAQs and receive broadcast notifications to keep them in the communications loop.
